Dear Parents,

Effective immediately, it is required that you as parents notify Baby, Toddler and Preschool Land if **your child or anyone in your household** has been exposed to a communicable disease. A communicable disease is defined as any disease that could be transmitted from one person to another.

We are required to post all exposures, by law. This means if your coworker comes to work with the flu (and has not been to a doctor and been on medication) and you have been exposed to this, you could get it and pass it on to your child. Who in turn could bring these germs to our school. Or if your child was playing with their friend, over the weekend, and the next day the parent of that child calls you and tells their child has pink eye, you must let us know.

Please sign the following form, we must post it in your file:

I, _____, the parent of _____, understand that if my child or anyone in my household has been exposed to a communicable disease, I will notify Baby, Toddler, and Preschool Land **immediately**. Baby, Toddler and Preschool Land will then post this information at the school.
